Past perfect continuous

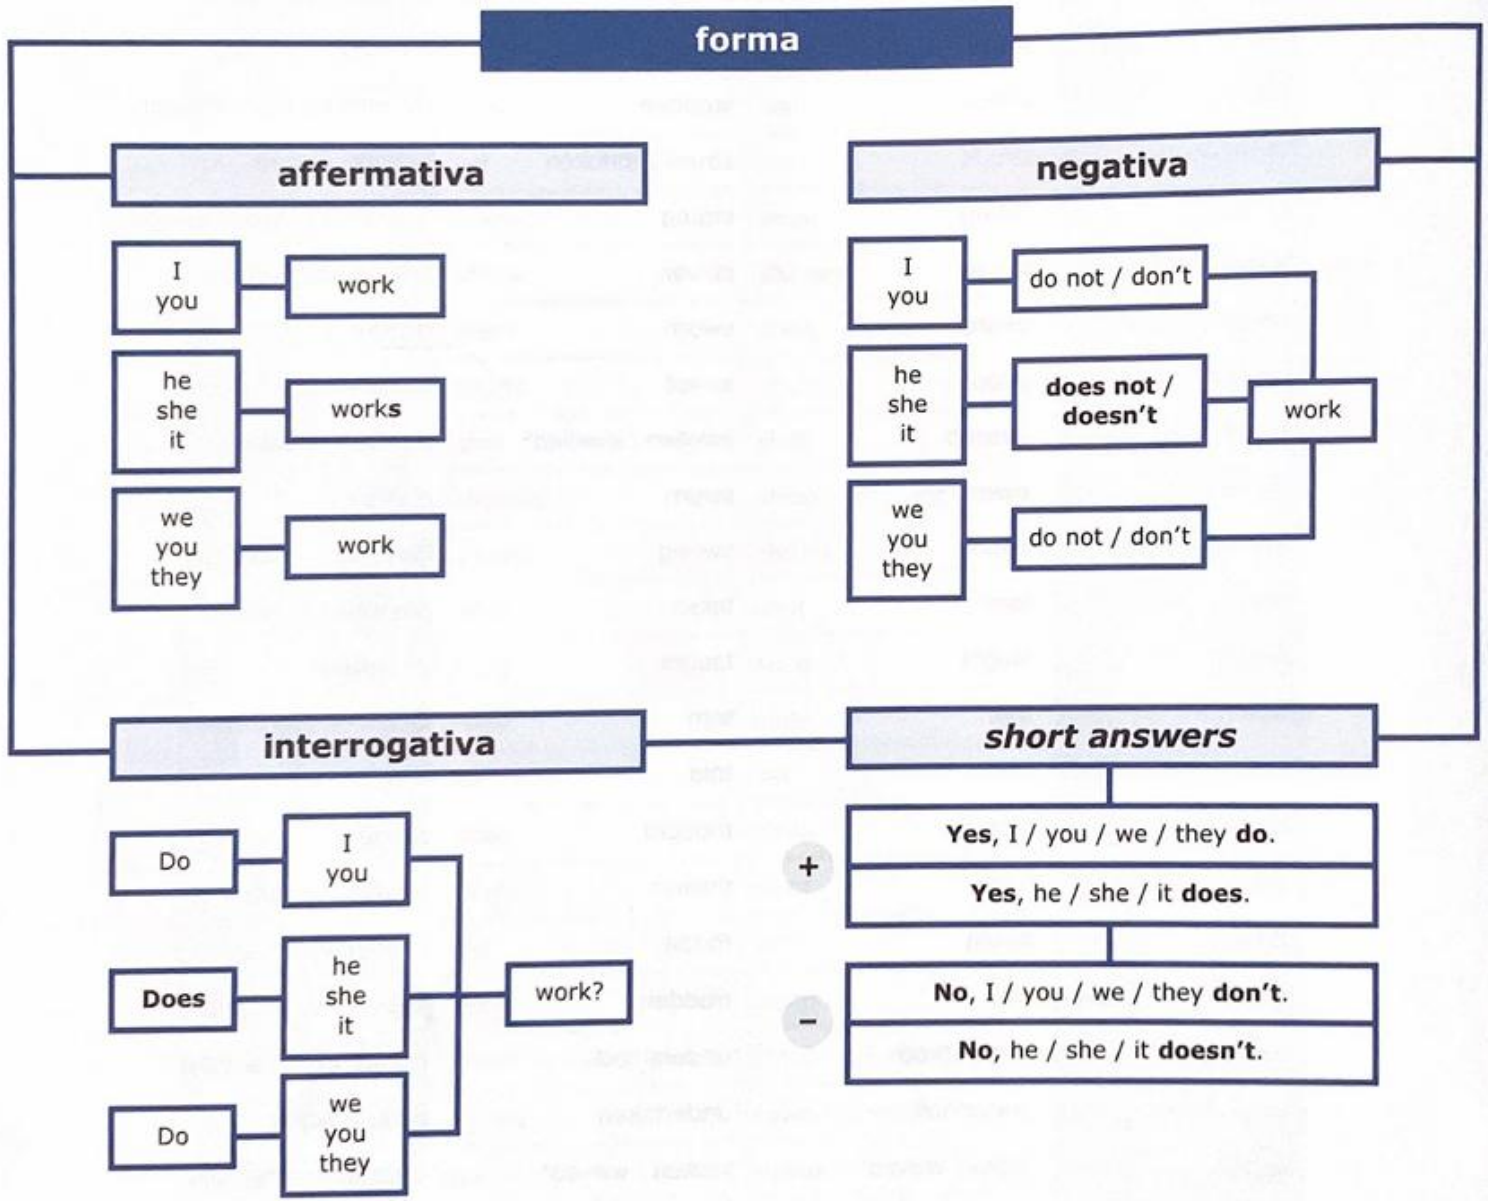

usi
enfatizzare lo **svolgimento** di un'**azione avvenuta nel passato prima di un'altra** o prima di un momento preciso del passato
*They **had been sleeping** when I arrived.*
(**Stavano dormendo** quando arrivai.)
sottolineare il **prolungarsi** di un'azione avvenuta nel passato (**duration form** nel passato)
*He **had been working** on that project for years.*
(**Stava lavorando** a quel progetto da anni.)
esprimere **sorpresa** o **disappunto** per un'azione avvenuta nel passato (spesso nella **duration form**)
*He **had been talking** to me for two hours!*
(**Mi stava parlando** da due ore!)
informarsi sulla **durata di un'azione avvenuta nel passato** (domande con **How long...?**)
*How long **had** they **been working** there?*
(**Da quanto tempo** lavoravano lì?)

» Past perfect simple vs Past perfect continuous

Simple present

Simple present con valore futuro

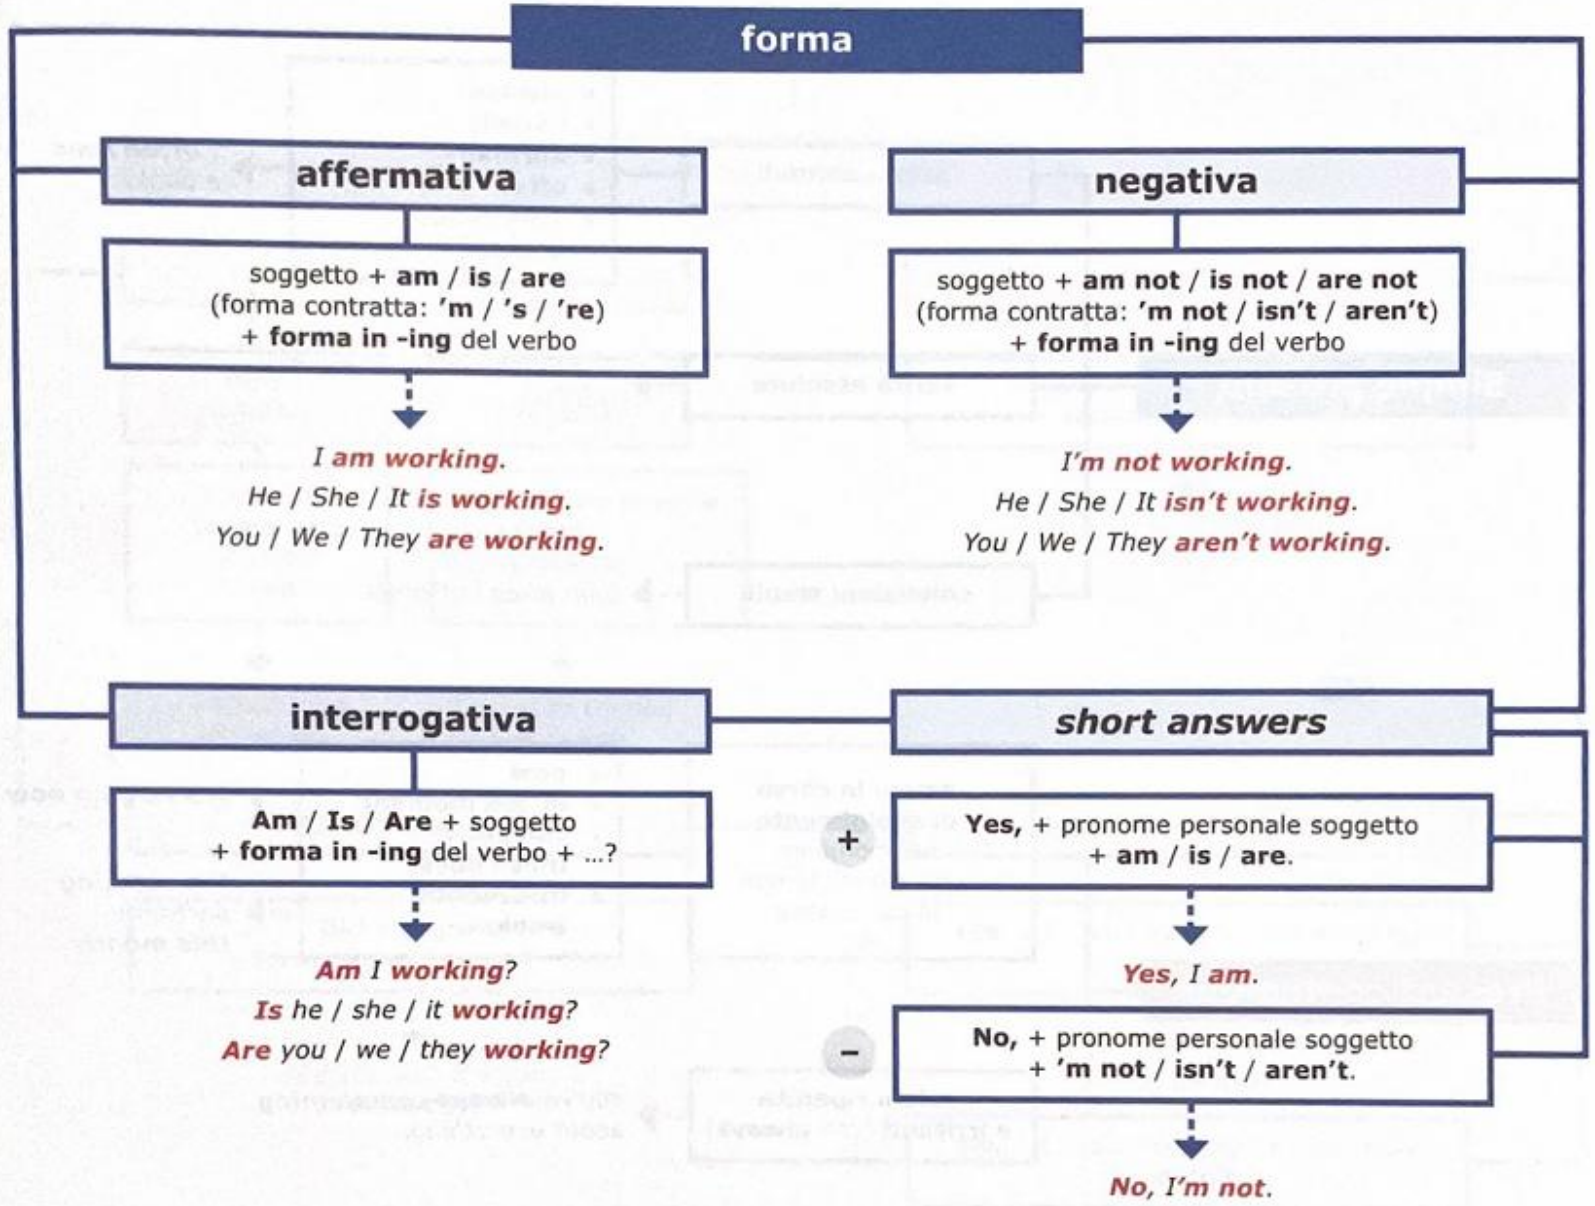

Il **simple present** esprime **azioni future che avranno luogo di sicuro**, tanto che vi sono **orari e calendari prestabiliti** (**timetables**: orari di mezzi di trasporto, programmi TV, spettacoli, lezioni, servizi pubblici). Queste azioni non dipendono dalla volontà di chi parla e di solito sono rese in italiano con l'indicativo presente.

e.g. The shows begin at 9.00 p.m.

Completare le frasi con il **present simple** dei verbi tra parentesi.

1. The train (leave) at 7:30 a.m. tomorrow.
2. Our summer holiday (begin) on July 15th.
3. The film (start) in ten minutes.
4. When ___ your next lesson (begin)?
5. What time ___ the bank (open) tomorrow?
6. I (have) an important meeting with the board next Monday.
7. What time (do) the football match (finish) tonight?
8. The bus to Venice (arrive) at 10:15 a.m.

Present continuous

Present continuous con valore futuro

Il **present continuous** esprime **azioni future prestabilite e programmate da chi le compie**. Sono azioni di cui sono già iniziati i preparativi e che difficilmente verranno rinviate o modificate.
e.g. He can't leave. He's having an exam tomorrow.

Il present continuous con valore futuro è spesso accompagnato da **espressioni di tempo futuro** (*tonight, this evening, tomorrow, next week, ecc.*) che differenziano quest'uso dagli altri usi.
e.g. Anna is studying now. (valore presente)
Anna is studying tonight with a friend of hers. (valore futuro)

N.B. Con i verbi **go, leave** e **come** si usa spesso il **present continuous** anche se l'azione futura è solo una generica intenzione e non sono stati fatti programmi prestabiliti né preparativi.
e.g. He is coming here in summer, but I don't know when.

Completare le frasi con il **present continuous** dei verbi tra parentesi.

1. I (see) the doctor at 3 p.m. tomorrow.
2. My parents (travel) to Italy next summer.
3. We (have) a barbecue in the garden on Saturday.
4. She (not / work) next Friday because she took a day off.
5. (___) you (come) to the cinema with us tonight?
6. The children (visit) the new amusement park next month.
7. What time (___) he (leave) for the airport this evening?
8. I (start) my piano lessons on Tuesday.

Scegliere se utilizzare il **present simple** o il **present continuous** dei verbi tra parentesi.

1. We (go) to Scotland next week.
2. Sam is ill. He (not come) to school tomorrow.
3. I can’t see you at 6.30. I (meet) some friends at that time.
4. What time (the football match/start)?
5. The ferries from Calais (arrive) tomorrow morning.
6. What (you/do) this evening?
7. We can play tennis the day after tomorrow. I (not work).
8. The English course (finisch) on 27° May.
9. Sarah and Ted (get) married next month.
10. The train to Canterbury (leave) at 11.25.
11. (you/come) to my birthday party tomorrow afternoon?
12. Hurry up! The film (start) at 8 o’clock.

Information technology now offers a range of attractive career options for workers with a wide variety of interests, skill levels, and career ambitions.

IT Support

An IT support group provides technical support to resolve issues related to computers, phones, networks, printers, and other devices. Support groups communicate with end users and sometimes act as the interface between users and software developers. Typical job roles in this field are support staff, support engineers, business analysts, and support managers. Employees in these roles also come from all academic backgrounds. Many university students work as IT support staff as a starting point into IT careers.

Data Management

This group focuses on storing, structuring, and retrieving data efficiently. They design databases to ensure data is accurate and available for decision-making and strategic planning activities. Typical job roles in this field are database administrators, data architects, data modelers, and cloud specialists. Organizations are now increasingly interested in using their available data to improve decision-making. New roles such as data eData management involves a mix of general programming abilities and specialized data handling abilities (using programming languages like SQL).

Cybersecurity

Cybersecurity experts keep organizations safe from hackers and malicious users by constantly monitoring threats and taking remedial action. They ensure that all computers in the organization are running the correct versions of software and unauthorized users cannot access systems.

As employees can and often do reveal company secrets and information accidentally, cybersecurity experts must also train employees in security best practices to always keep one step ahead of hackers.

Computer Forensics

Computer forensics is the collection and preservation of evidence from computers for presentation in courts of law. This field is becoming increasingly important for cops and investigators because computers are used to plan many crimes.Computer forensic experts recover deleted files and track digital information to figure out how a computer, network, or cell phone was used in a crime. With a few keystrokes, they can collect the required proof to connect a criminal to a crime. Most police departments hire cybersecurity experts.

1. What is the main purpose of the introduction?
